Application Name: Chef It Up

Application Description

Our application, "Chef It Up", is a culinary companion that helps users sift through a multitude of recipes to find the perfect match for their culinary skills, busy schedules, and more. By offering a user-friendly interface, the application streamlines the process of dining recipes on Google that can be hindered by paywalls or pop-up ads. The value of this application will save users time and encourage users to explore while having fun in the kitchen.

Furthermore, the application aims to be a versatile tool in meal planning and preparation. It goes beyond simple filtering, as it offers the user to save recipes that they tried. The intent is to only cater to those who cook all the time but also beginners who want to start cooking. With an emphasis on personalization, the app ensures that each user's experience is unique and suited to their individual taste, making cooking at home a more accessible and enjoyable endeavor.

Vision Statement

For home cooks, both beginners and masters looking to try new recipes. The application Chef It Up is a recipe search that filters recipes by difficulty, cook time, and more. Unlike other recipe sites, our product offers more customization and better features.

Version Control

<https://github.com/ksuoo/CSCI3308-Project>

Development Methodology

Agile Methodology. Weekly scrum meetings with our TA and project board with the details mentioned on the course website.

Communication Plan

Created a group chat to communicate with each other. Meetings in-person at CSEL or online using Zoom.

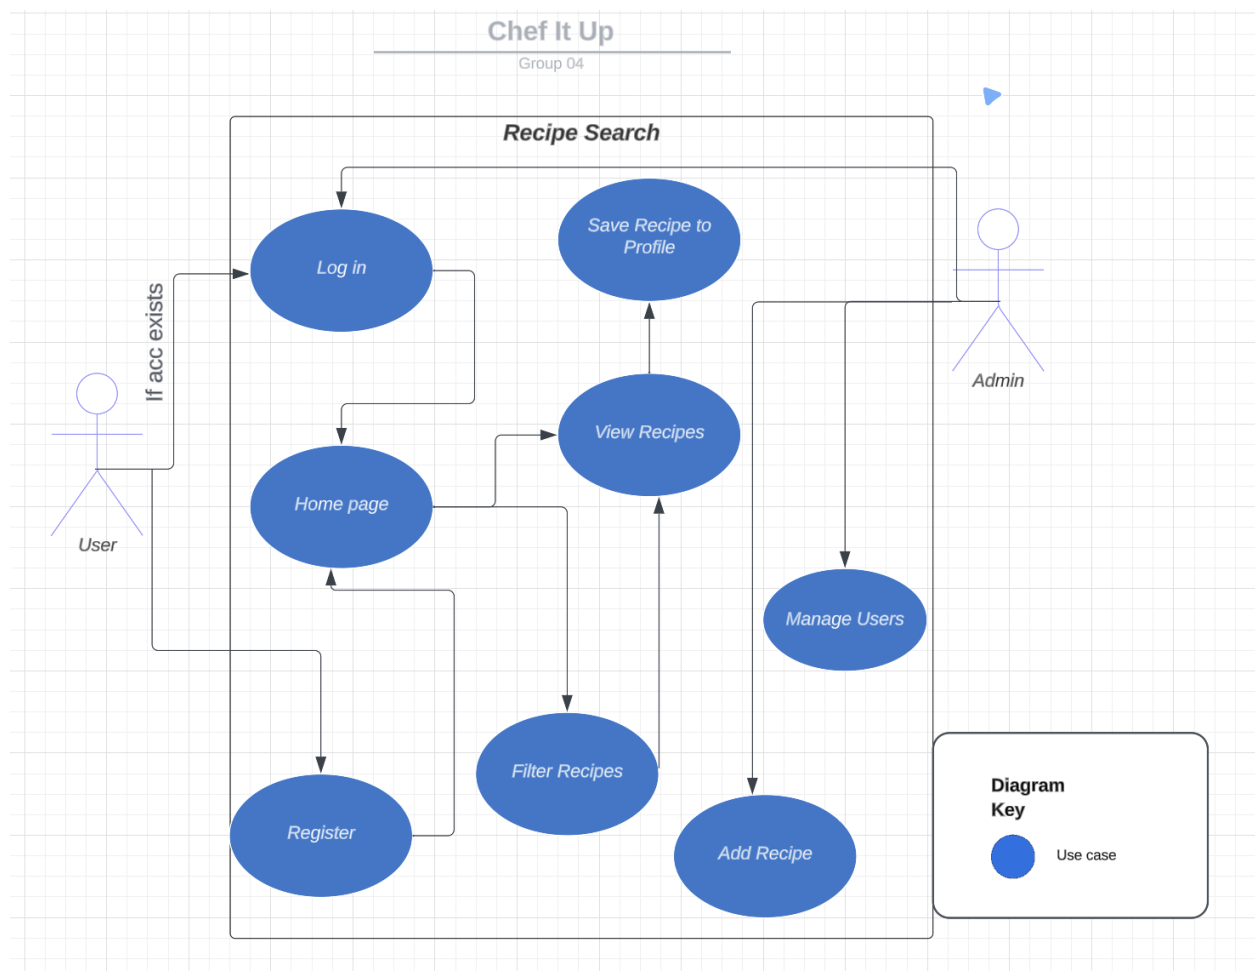

Communication with our TA can be done through email, office hours, and during recitation.

Meeting Plan

Team Meeting: Weekly meetings on Tuesdays at 6:00 PM in CSEL

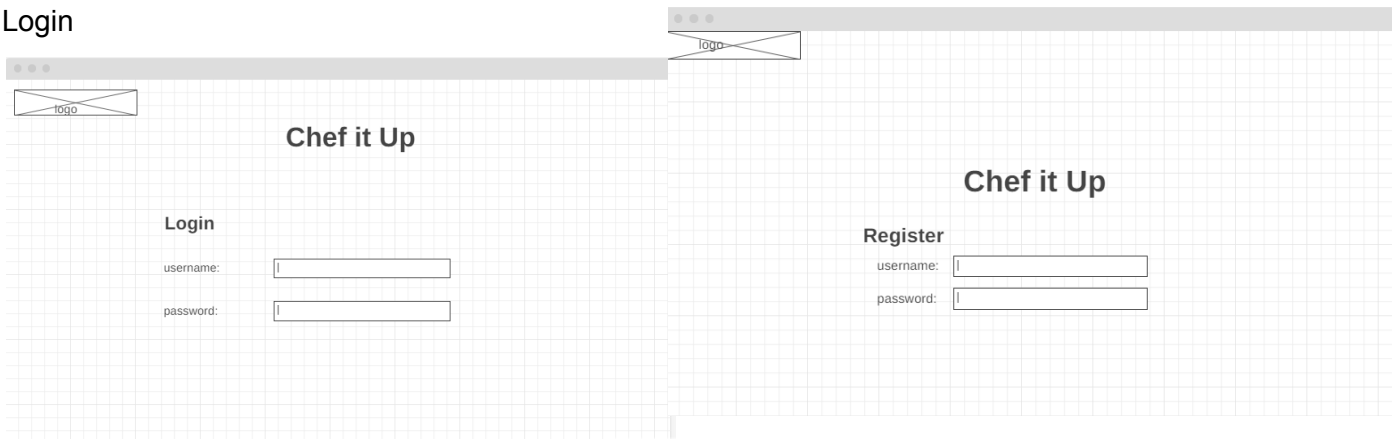

Meeting Plan with TA: Meetings on Wednesday, 6:00 PM on Google Meet (Online).
