Decisions:
Decided on the project idea for doing a recipe search

Roles and responsibilities:
Charan: Working on insert sql and finding recipes online to insert into the database. Writing the insert query for sql

Bianca: Getting the layout for each page and working on the template for each of the pages to get an idea of what each page should look like.

Kaile: Worked on setting up github repository, project board, and proposal. Looking at previous labs and finding the code that applies to the project and changing it make it work for that

Zach: Help Bianca and Kaile on the coding to make sure each of the pages are set up correctly. Work on the stylistic features of the pages.
